Official Demographic & Demographic Insights — Heritage Edition

Scope of Study: Descendants of Hart, Leon George (Living & Historical Records) — Compiled 1700–2026

Executive Overview

This statistical audit compiles historical trends, maternal timelines, naming conventions, and household structural densities across generations of documented family tree records. By processing these datasets, this report preserves structural family milestones and offers key historical insights into our collective lineage.

1 Lineage Surnames & Naming Traditions

1.1 Surname Density & Distribution

An overview of relative surname frequencies within active family records. This distribution highlights active generational growth, identifying core branches of our common descent.

Surname	Count	Visual Density (Normalized)
Hart	76	<div style="width: 100%;"></div>
Rebholz	17	<div style="width: 22.37%;"></div>
McEntee	16	<div style="width: 21.05%;"></div>
Bringley	9	<div style="width: 11.84%;"></div>
Burdick	8	<div style="width: 10.53%;"></div>
Terreri	7	<div style="width: 9.21%;"></div>
Higgins	5	<div style="width: 6.58%;"></div>
Shea	5	<div style="width: 6.58%;"></div>
Dempsey	4	<div style="width: 5.26%;"></div>
Neary	4	<div style="width: 5.26%;"></div>
Other Surnames	63	<div style="width: 83.16%;"></div>

1.2 Traditional Forename Frequency

Our family's most popular forenames reflect deep historical and cultural roots. The table below lists the most prominent names recorded across our lineage.

Forename	Count	Traditional Frequency Chart
Daniel	10	
Kathryn	8	
James	6	
John	6	
Joseph	6	
Matthew	6	
Patrick	6	
Rose	6	
Elizabeth	5	
Mary	5	
Michael	5	

2 Maternal & Marriage Milestones

2.1 Maternal Age Distribution: At First Child's Birth

This generational metrics section highlights biological milestones by tracking mothers' ages when welcoming their first-born children into the family circle.

Age at First Birth	Mothers	Frequency Bar (1 count = 3.5mm)
Under 20	2	
21 - 23	11	
24 - 25	11	
26 - 28	20	
29 - 30	20	
31 - 33	11	
34 - 36	4	

2.2 Maternal Age Distribution: At Last Child's Birth

An analytical view tracking maternal ages recorded during final sibling births. This dataset offers clear insight into long-term generational spacing and cohort expansion.

Age at Last Birth	Mothers	Frequency Bar (1 count = 3.5mm)
Under 25	5	
26 - 28	11	
29 - 31	21	
32 - 34	21	
35 - 37	11	
38 - 40	7	
Over 40	2	

2.3 Age at Marriage Timeline

This generational snapshot displays individual marriage occurrences relative to age ranges, demonstrating primary cultural, structural, and timeline milestones.

Age at Marriage	Total Occurrences	Frequency Chart (1 count = 4mm)
Under 20	3	
21 - 23	16	
24 - 26	19	
27 - 29	18	
30 - 32	10	
33 - 35	5	
36 - 39	4	
40+	4	

3 Household Units & Seasonal Cycles

3.1 Family Sibling Counts (Household Density)

An evaluation of sibling sizes across historical units. Our records reveal a primary focus on two-child and three-child families, with several classic, large-scale households.

Sibling Count	Families	Frequency Visual
1 Child	11	
2 Children	36	
3 Children	18	
4 Children	5	
5 Children	6	
8 – 10 Children	3	

3.2 Generational Gender Distribution

A biological audit of cataloged descendants. Our records show a highly balanced, structurally stable demographic split.

Gender	Count	Demographic Split Percentage
Men	113	 (52.8%)
Women	101	 (47.2%)

3.3 Birth Frequency by Calendar Month

A seasonal overview organizing birth records chronologically across calendar months. May, April, July, and June represent the busiest birthday periods of the year.

Month	Births	Seasonal Timeline Visual
January	15	
February	18	
March	18	
April	22	
May	25	
June	20	
July	20	
August	17	
September	10	
October	14	
November	18	
December	17	

Document compiled and preserved by the Hart Family Archives.
